

BUSINESS INSIGHTS WITH POWER BI

by Microsoft

Your company has vast quantities of important information and data. Most of this data is stored in your sector-specific Microsoft Dynamics NAV solution, in Excel tables or in other data sources (streaming data, cloud services etc.). Power BI by Microsoft makes convenient organisation and integration of all your data from various sources possible.

CONVINCING DATA DASHBOARDS

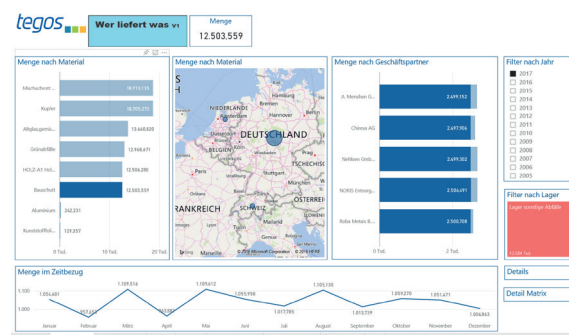

Clear dashboards featuring easy-to-understand, activity-relevant data visualisations allow you to benefit from decisive insights based on daily updated data.

REPORTS AS YOU NEED THEM

Using drag & drop and thanks to the intuitive user interface you can visualise business data according to your wishes: with reliable aggregated data for better decision-making.

SECTOR-SPECIFIC EXAMPLE REPORTS

Our enwis), comotor and myMetals® products include eight free of charge templates as well as sector-specific example reports, which you can make use of straight away.

Individual data visualisation with updated daily data

Import data from various sources

Access all your data via desktop, tablet and smartphone – anytime, anywhere

Share important findings via e-mail, links or Excel integration
